

Monthly Report

CLIENT: Hanson

SITE: Calga Sand Quarry

MONTH: July 2018

DESCRIPTION OF WORK

Zone	Type of Work	Weed Type	Work Description
5	Primary	Herbaceous	<ul style="list-style-type: none"> Low volume spraying was conducted between the track and fenceline, targeting <i>Bidens pilosa</i> (Cobblers Peg), <i>Conzya bonariensis</i> (Fleabane) and <i>Phytolacca octandra</i> (Inkweed).
		Woody	<ul style="list-style-type: none"> Cut-and-paint was conducted on the lower slope using neat Roundup Biactive®, targeting <i>Pinus radiata</i> (Radiata Pine).
8	Secondary	Herbaceous	<ul style="list-style-type: none"> Brush-cutting was conducted along the road side, targeting dead perennial weeds. Low volume spraying was conducted along the road side, targeting emerging growths of <i>B. pilosa</i>, <i>C. bonariensis</i> and <i>Hypochoeris glabra</i> (Flatweed).
9	Secondary	Herbaceous	<ul style="list-style-type: none"> Brush-cutting was conducted between the road side and sandstone wall, targeting dead perennial weeds. Low volume spraying was conducted along the road side, targeting emerging growths of <i>B. pilosa</i>, <i>C. bonariensis</i>, <i>H. glabra</i>, and <i>Andrapogon virginicus</i> (Whiskey Grass).

Notes:

All spraying utilised a solution of 1% Roundup Biactive® unless otherwise stated.

Site Progress:

Weed management appears to be effective. There has been noticeable regrowth, with a number of *Acacia longifolia* (Sydney Golden Wattle) reclaiming areas.

Fauna Recorded:

Red Brow Finch (*Neochemia temporalis*)
