

# Update

## **SUBJECT: PROJECT NAME CHANGE**

Thank you for taking the time to attend the Hanson Community Information Session at Bunyip Community Hall on Wednesday 23 March 2017. We greatly appreciate your effort.

We also appreciate your questions and comments which are being considered in the development of the scoping requirements for the Environmental Effects Statement (EES).

One of the issues raised by several community members in attendance was their preference for the proposed project to be named Bunyip North Quarry rather than Garfield North Quarry. To respond to this concern, Hanson consulted with the Department of Environment, Land, Water and Planning (DELWP) in relation to changing the project name. The department endorsed the change in project name and the project title is now officially recognised as Bunyip North Quarry.

Further, DELWP has indicated its intent to conduct the first meeting of the Technical Reference Group in May and it is expected that the draft scoping requirements will be on public exhibition in June, 2017. Hanson will keep you updated and you can track the status of the EES at <http://www.hanson.com.au/About/Regulatory-Information/Projects/Bunyip-North-Quarry-EES>.

Meanwhile, should you have any queries or require further information, please do not hesitate to contact me at [community.bunyipnorth@hanson.com.au](mailto:community.bunyipnorth@hanson.com.au) or on (03) 9274 3700.

Regards

Stephanie Salinas  
Project Development Manager
